I have gained practical experience in systems development, requirements analysis, business process documentation, and application support through professional training, academic projects, and volunteer work. My experience includes software development, UI/UX design, and system testing, providing me with exposure to both technical requirements and business needs within system development projects.

EDUCATION

Taibah University

Bachelor’s Degree in Computer Science

Graduated: Nov 2022 – GPA: 4.47 / 5 (Second Class Honors)

Experience – Tamheer Program

Madinah Health Cluster – Digital Transformation and Technology Department

Nov 2025 – May2026

Applications Development

Core Responsibilities

- Contributed to analyzing business and user requirements and translating them into functional system requirements.
- Documented and modeled requirements using BPMN and Use Case Diagrams.
- Designed UI/UX interfaces and contributed to workflow analysis to support system development.
- Participated in web application development using PHP, Laravel, and Filament.
- Performed functional testing and issue validation to support system quality and reliability.

Key Achievements

- Participated in the analysis of the "Madar" Vehicle Management System and designed UI/UX interfaces to support user and business requirements.
- Contributed to documenting business requirements, process workflows, and system use cases.
- Implemented selected application functionalities using PHP, Laravel, and Filament.
- Conducted functional testing and issue validation for developed functionalities to support system quality and reliability.

Data Analysis

Core Responsibilities

- Analyzed operational and document-related data to support reporting and performance monitoring.
- Designed and developed dashboards and interactive reports to visualize key platform indicators.
- Managed, organized, and archived digital documents to improve information accessibility and management efficiency.

Key Achievements

- Developed dashboards that enhanced the visibility and monitoring of platform and document-related indicators.
- Organized and archived more than 200 digital documents, improving information accessibility and retrieval efficiency.

GRADUATION PROJECT

FAZAA Application

Jan 2022 – Nov 2022

Mobile application that connects users with nearby service providers to rent products or request on-demand services.

Technologies: Dart, Flutter, Firebase, Figma

Responsibilities:

- Analyzed system requirements and defined user flows and data structures.
- Designed UI/UX prototypes in Figma.
- Developed core application features in Dart and supported Firebase integration.
- Executed functional testing to ensure application quality and performance.

VOLUNTEERING

Software Developer – Ratel Digital Association

Nov 2024 – Jan 2025

- Improved website responsiveness across mobile and tablet devices to enhance usability and user experience.
- Implemented UI/UX design enhancements to support the platform’s goals and content delivery.

PROFESSIONAL CERTIFICATE

Google Data Analytics – Google / Coursera, Feb 2024

TRAINING COURSES

- Python, HTML, CSS & JavaScript - Satr Platform
- Designing User Interfaces & Experiences (UI/UX) - Coursera
- Software Testing Fundamentals for ISTQB Exams Prep - Specialization Certificate
- Laravel (PHP) Web Development Training Program – Tuwaiq Academy
- Data Analytics (Level 1 & Level 2) - Saudi Digital Academy (SDA) & Coursera
- Digital Transformation - Droob
- Fundamentals of Artificial Intelligence - SDAIA

SKILLS

Technical Skills:

- HTML,JS,CSS,PHP- Laravel, Filament
- Java
- SQL
- Functional Testing
- Requirements Analysis
- Jira
- UI/UX Design (Figma, Prototyping)
- Digital Transformation Concepts

Soft Skills:

- Communication
- Time Management
- Analytical Thinking
- Problem Solving
- Collaboration & Teamwork
- Attention to Detail

LANGUAGE

- English language
