I combine analytical, technical, and organizational skills gained through professional training, academic projects, and volunteer work. My experience includes data analysis, reporting, dashboard development, requirements analysis, business process documentation, and contributing to systems development and application support. I enjoy working on challenges that require an understanding of data, processes, and technology together, and I aim to apply these skills to support operational efficiency and business objectives.

EDUCATION

Taibah University

Bachelor’s Degree in Computer Science
Graduated: Nov 2022– Class Honors

Experience – Tamheer Program

Madinah Health Cluster – Digital Transformation and Technology Department Nov 2025 – May2026

Applications Development

Core Responsibilities

- Contributed to analyzing business and user requirements and translating them into functional system requirements.
- Documented and modeled requirements using BPMN and Use Case Diagrams.
- Designed UI/UX interfaces and contributed to workflow analysis to support system development.
- Participated in web application development using PHP, Laravel, and Filament.
- Performed functional testing and issue validation to support system quality and reliability.

Key Achievements

- Participated in the analysis of the Vehicle Management System and designed UI/UX interfaces to support user and business requirements.
- Contributed to documenting business requirements, process workflows, and system use cases.
- Implemented selected application functionalities using PHP, Laravel, and Filament.
- Conducted functional testing and issue validation for developed functionalities to support system quality and reliability.

Data Analysis

Core Responsibilities

- Extracted and analyzed operational and document-related data.
- Developed dashboards and visual reports to monitor platform indicators and support data-driven decision-making.
- Prepared reports and visualizations to support performance monitoring and operational tracking.
- Managed and organized digital documents to improve accessibility and information management.

Key Achievements

- Developed dashboards that visualized platform and document indicators using charts and graphical reports.
- Organized and archived more than 200 digital documents, improving accessibility and reducing retrieval time.
- Improved the availability and visibility of operational data through dashboard development and reporting activities.

VOLUNTEERING

Software Developer – Ratel Digital Association Nov 2024 – Jan 2025

- Improved website responsiveness across mobile and tablet devices to enhance usability and user experience.
- Implemented UI/UX design enhancements to support the platform’s goals and content delivery.

Trainee – Deanship of Information Technology and E-Learning – Islamic University Aug 31, 2025 – Oct 29,

- Built foundational knowledge in Enterprise Architecture and Digital Transformation concepts through exposure to TOGAF framework and NORA standards.
- Modeled and documented business processes using BPMN and Visual Paradigm to support workflow analysis and process understanding.

PROFESSIONAL CERTIFICATE

Google Data Analytics – Google / Coursera, Feb 2024

TRAINING COURSES

- Python, HTML, CSS & JavaScript - Satr Platform
 - Designing User Interfaces & Experiences (UI/UX) - Coursera
 - Data Analysis & Representation using Microsoft Excel - Tuwaiq Academy
 - Power BI Data Analysis & Visualization - Ministry of Communications & IT
 - Data Analytics (Level 1 & Level 2) - Saudi Digital Academy (SDA) & Coursera
 - Laravel (PHP) Web Development Training Program – Tuwaiq Academy
- Digital Transformation - Droob
 - Fundamentals of Artificial Intelligence - SDAIA
 - Digital Transformation & Digital Identity - Satr Platform

SKILLS

Technical Skills:

- Data Analysis & Visualization
- HTML,JS,CSS,PHP- Laravel, SQL, Python
- Jira , GitHub
- UI/UX Design (Figma, Prototyping)
- Digital Transformation Concepts
- Microsoft Word, PowerPoint, Excel, Power BI

Soft Skills:

- Communication
- Time Management
- Analytical Thinking
- Problem Solving
- Collaboration & Teamwork

LANGUAGE

- English language
